About Us

Applied Polymerics (AP) is an infrastructure maintenance contractor specializing in concrete, bridges, highways, water and wastewater treatment plants, and geotechnical applications. AP is renowned for its innovative engineering solutions delivered in a safe, cost-effective and sustainable manner.

Established in 1994, the business is now a publicly owned subsidiary of **USL Group**, a multinational specialty coatings conglomerate. We currently have 60 employees throughout the Mid-Atlantic and Southeast.

Applied Polymerics can conduct the initial condition surveys to identify the nature and extent of any deterioration in the asset. This allows us to then provide professional and informed advice on how to repair the defects. We do the majority of the repair work using our own skilled crew members and professional management team.

Bridge & Highway Preservation

Our services extend into many sectors of the industry, including bridge and highway structures. We work as a prime contractor and subcontractor, completing short- and long-term contracts. We make emergency repairs to damaged structures.

All services within AP are carried out by our own qualified employees. We are licensed applicators of industry construction products. We provide innovative and cost-effective solutions for bridge and highway maintenance.

Applied Polymerics can repair concrete with minimal disruption to traffic and business operations.

SPECIALIST SERVICES

- Expansion Joint Repairs & Replacement
- Silicone Joint Sealing
- Elastomeric Concrete
- Overhead/Vertical Concrete Repairs
- Steel Beam Repairs & Painting
- Waterproofing Systems
- Partial & Full Depth Repairs
- Culvert Installation
- Mastic Sealants
- Traffic Control

Quality

At Applied Polymerics we understand that our goal of zero defects in all operations can only be reached if an effective quality system is in place throughout the company. AP operates a Quality Management System that complies with US requirements.

Industry Association

AP is a member of APWA, Southeast Bridge Preservation Partnership, American Concrete Pavement Association, NCRWA and the NCAA.

Technical & On-Site Support

Our unrivaled technical expertise ensures that you receive the most appropriate advice right from the start, setting your project up for success.

Soil Stabilization

Sinkhole Remediation

Slab Lifting

Geotechnical

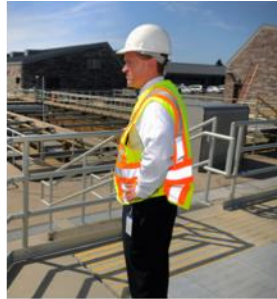

Applied Polymerics is an approved applicator of a wide range of polyurethane injection resins that may be used in multiple ‘no dig’ geotechnical applications.

Our experienced workforce has been involved in many projects, from minor repairs to complex ones. We have consistently delivered on time and on budget for multiple municipalities and DOTs.

The materials used for this type of work are **environmentally friendly** and meet **NSF/ANSI Standard 61 for contact with potable water**.

SPECIALIST SERVICES

- Urethane Grouting
- Slab Leveling
- Void Filling
- Soil Stabilization
- Sinkhole Remediation
- Slope Protection

Storm, Sewer & Water Treatment

With wastewater and water treatment plants generally running at full capacity, and compliance issues becoming ever more critical, it is vitally important water authorities maintain their assets on a regular basis to ensure they are in perfect working order.

Applied Polymerics has extensive experience in the repair and rehabilitation of storm, sewer, water and wastewater treatment plants. Failure to properly maintain assets can present significant safety, environmental and financial risks.

Using the latest repair methods and materials, AP can restore assets to their original new-build standards, as well as substantially extend the life of structures.

SPECIALIST SERVICES

- Leak Repairs
- Pipe Replacement & Rehabilitation
- Repairs to CMP & RCP
- Culvert Repairs
- Manholes & Catch Basins
- CCTV Pipe Inspection
- Slip Lining
